Open Source Software Center

Established on January, 1st 2006

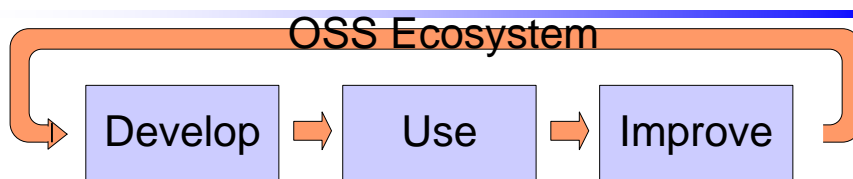

Tokyo JAPAN

Our Goal

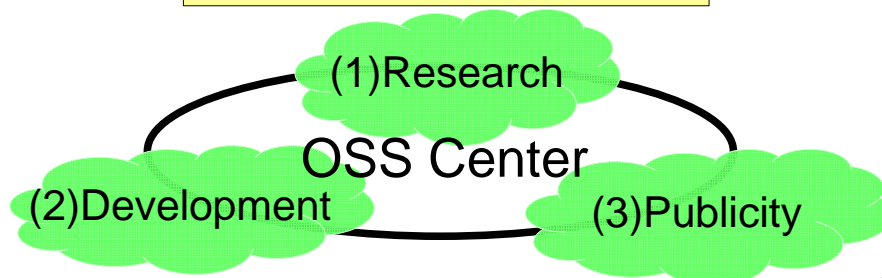

- Build sustainable basis for IT society
 - Software diversity
 - Fair competitive environment
 - HRD for next generation
- Boost OSS Ecosystem
 - User support
 - Developer support
 - Life cycle support

Role of OSS Center

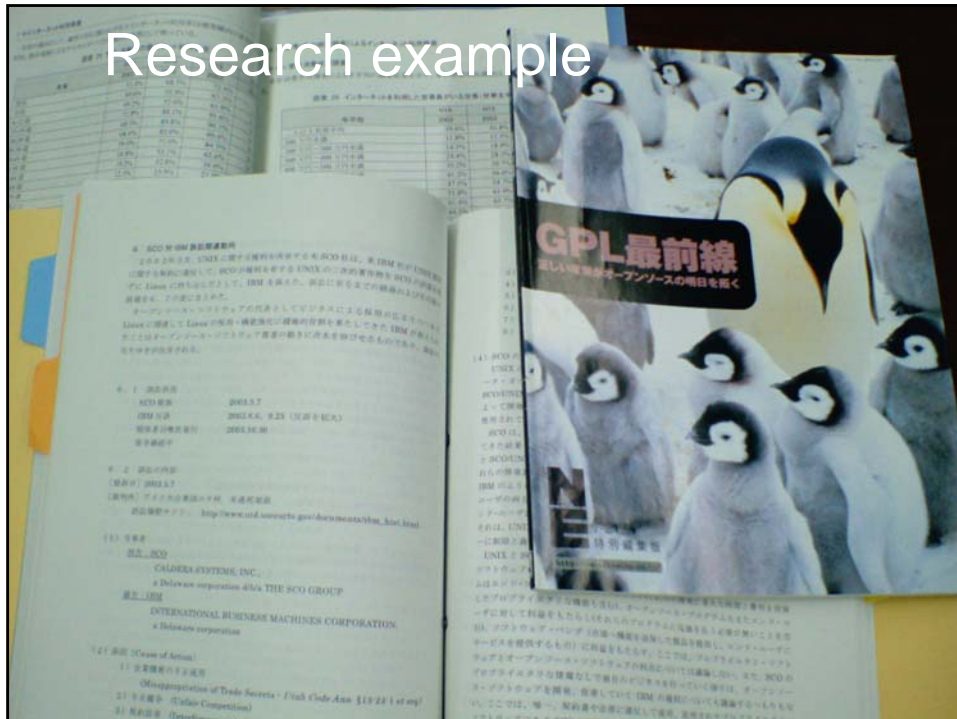

Contribute to OSS Ecosystem

(1) Research

- Best practice
 - System architecture
 - Migration process
 - Interoperability
 - Procurement policy
 - ... etc.
- Legal Issues
 - Licence, Patent
- Risk analysis
 - Vulnerability
 - Litigation

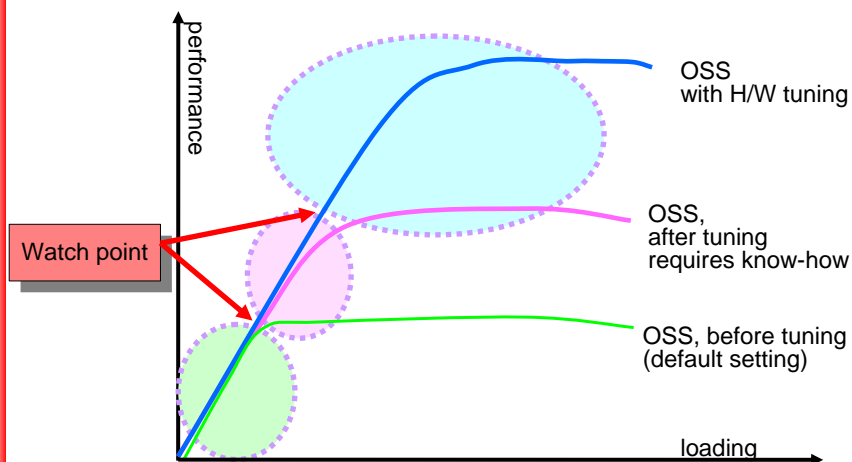

(2) Development

- Performance evaluation
ex) Java AP layer evaluation,
DB layer evaluation
- Development support
 - Theme oriented development
 - Proposal oriented development
- Field test & demonstration
ex) School , Local Government
- Open Laboratory (future plan)

Performance evaluation

The performance evaluation of the OSS middle-ware clarify how we can utilize OSS at this time.
The evaluation team wants to be available 3 lines, continuously.

Field test (in school)
